

**Amendments to the Substitute Specification:**

Please replace the paragraph previously inserted on page 7, between lines 19 and 20, with the following new paragraph:

Figure 4 illustrates a wind power installation 100 having a pylon 10 having a head 102. A vehicle 104 has a winch 106 mounted to it. The vehicle 104 is positioned so that the winch 106 is outside the pylon 10. A cable 112 is coupled to the winch 106, passes through a first cable passage means 114, a second cable passage means 116, which is located above the head 102 of the pylon 10, and a third cable passage means 118. The cable 112 may be used to raise and lower an object inside the pylon 10, such as a component of the wind power installation 120.
